WSI Technologies Launches iRecord Nexus Cloud Solutions

INDIANAPOLIS, IN (November 1, 2024) – WSI Technologies announces the launch of iRecord Nexus, a cloud-based solutions product.

“This product transforms the experience for our clients as iRecord Nexus incorporates significant features that simplify the user interface and enhance collaboration. The result is dramatic time savings, improved compliance and superior outcomes,” said Jim Halsmer, President of WSI Technologies. “These best-in-class features are critical for our clients who are constantly battling budget, staffing and resource constraints in their mission-critical daily work of keeping our communities safe.

iRecord Nexus joins the established WSI Technologies product portfolio as its most universal, flexible solution offering to date. “iRecord Nexus has been thoughtfully architected and rigorously tested to benefit our clients,” stated Adam Schultheis, Director of Technology Solutions, WSI Technologies. “We focused on efficiency for our end users and security for their data. Providing our customers what they need, an intuitive and simple product that gives them more flexibility for managing their recordings and digital evidence.”

iRecord Nexus is a cloud solution hosted in Azure Government and provides clients with redundant storage, remote viewing, and secure sharing of interview recordings, documents, and other digital evidence.
